## CARBON REDUCTION PLAN GUIDANCE

### Notes for Completion

Where an In-Scope Organisation has determined that the measure applies to the procurement, suppliers wishing to bid for that contract are required at the selection stage to submit a Carbon Reduction Plan which details their organisational carbon footprint and confirms their commitment to achieving Net Zero by 2050.

Carbon Reduction Plans are to be completed by the bidding supplier<sup>1</sup> and must meet the reporting requirements set out in supporting guidance, and include the supplier's current carbon footprint and its commitment to reducing emissions to achieve Net Zero emissions by 2050.

The CRP should be specific to the bidding entity, or, provided certain criteria are met, may cover the bidding entity and its parent organisation. In order to ensure the CRP remains relevant, a Carbon Reduction Plan covering the bidding entity and its parent organisation is only permissible where the detailed requirements of the CRP are met in full, as set out in the Technical Standard<sup>2</sup> and Guidance<sup>3</sup>, and all of the following criteria are met:

- The bidding entity is wholly owned by the parent;
- The commitment to achieving net zero by 2050 for UK operations is set out in the CRP for the parent and is supported and adopted by the bidding entity, demonstrated by the inclusion in the CRP of a statement that this will apply to the bidding entity;
- The environmental measures set out are stated to be able to be applied by the bidding entity when performing the relevant contract; and
- The CRP is published on the bidding entity's website.

Bidding entities must take steps to ensure they have their own CRP as soon as reasonably practicable and should note that the ability to rely on a parent organisation's Carbon Reduction Plan may only be a temporary measure under this selection criterion.

The Carbon Reduction Plan should be updated regularly (at least annually) and published and clearly signposted on the supplier's UK website. It should be approved by a director (or equivalent senior leadership) within the supplier's organisation to demonstrate a clear commitment to emissions reduction at the highest level. Suppliers may wish to adopt the key objectives of the Carbon Reduction Plan within their strategic plans.

A template for the Carbon Reduction Plan is set out below. Please complete and publish your Carbon Reduction Plan in accordance with the reporting standard published alongside this PPN.

---

<sup>1</sup>Bidding supplier or 'bidding entity' means the organisation with whom the contracting authority will enter into a contract if it is successful.

# Carbon Reduction Plan Template

Supplier name: Frost & Sullivan Limited

Publication date: 18<sup>th</sup> August 2021

## Commitment to achieving Net Zero

**Frost & Sullivan** is committed to achieving Net Zero emissions by 20**40**.

## Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

<b>Baseline Year: 2020</b>	
<b>Additional Details relating to the Baseline Emissions calculations.</b>	
Frost & Sullivan operates its London office in a sustainable compound that provides green energy sources. This allowed Frost & Sullivan to save in emissions from electricity in such location to the amount of 48.1 mtCO <sub>2</sub> e in 2020 and 16.9 mtCO <sub>2</sub> e in 2021 by utilizing green energy that otherwise would've generated such emissions.	
<b>Baseline year emissions:</b>	
<b>EMISSIONS</b>	<b>TOTAL (mtCO<sub>2</sub>e)</b>
Scope 1	<b>17.610</b>
Scope 2	<b>16.147</b>
Scope 3 (Included Sources)	<b>67.841</b>
<b>Total Emissions</b>	<b>101.6</b>

## Current Emissions Reporting

<b>Reporting Year: 2021</b>	
<b>EMISSIONS</b>	<b>TOTAL (mtCO<sub>2</sub>e)</b>
<b>Scope 1</b>	<b>34.65</b>
<b>Scope 2</b>	<b>91.90</b>
<b>Scope 3 (Included Sources)</b>	<b>64.838</b>
<b>Total Emissions</b>	<b>77.494</b>

### **Emissions reduction targets**

**There was also a major reduction in office space in 2021 which allowed Frost & Sullivan to reduce their emissions in other subcategories in Real Estate.**

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets.

We project that carbon emissions will decrease over the next five years to 60 mtCO<sub>2</sub>e by 2027. This is a reduction of 50% and an ultimate goal to achieve Net Zero by 2040.

Progress against these targets can be seen in the graph below:

## Carbon Reduction Projects

### Completed Carbon Reduction Initiatives

The following environmental management measures and projects have been completed or implemented since the 2020 baseline. The carbon emission reduction achieved by these schemes equate to 48.1 mtCO<sub>2</sub>e, a 32%ge reduction against the 2020 baseline and the measures will be in effect when performing the contract

*Briefly provide details of some of your completed carbon reduction projects. This is for information only.*

**Frost & Sullivan operates its London office in a sustainable compound that provides green energy sources. This allowed Frost & Sullivan to save in emissions from electricity in such location to the amount of 48.1 mtCO<sub>2</sub>e in 2020 and 16.9 mtCO<sub>2</sub>e in 2021 by utilizing green energy that otherwise would've generated such emissions.**

In the future we hope to implement further measures such as:

**Given the lockdown in 2021 and 2022 - it resulted in very limited business travel and we expect business travel to increase overall emissions and we will be evaluating options both to reduce business travel and look to offset emissions for the essential business travel.**

**We are also considering the option of a shared office space which will also help with reducing overall emissions and increasing flexibility in terms of capacity of office space needed as we move forward with our hybrid working policy.**

## Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard<sup>4</sup>

<sup>4</sup><https://ghgprotocol.org/corporate-standard>

and uses the appropriate Government emission conversion factors for greenhouse gas company reporting<sup>5</sup>.

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard<sup>6</sup>.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

**Signed on behalf of the Supplier:**

A handwritten signature in black ink, appearing to be 'Iain Jawad', written in a cursive style.

Iain Jawad
