Yesterday, the Frost & Sullivan India Manufacturing & Excellence Awards (PERP - Project Evaluation & Recognition Program) once again highlighted how Indian manufacturing is advancing through scale, technology, sustainability, safety, and execution discipline.

This year's recognitions spanned a wide spectrum: from environment leadership, safety, digital modelling, customer value, and community development to AI-led communication innovation and large-scale manufacturing excellence.

Apex recognitions included:

- Indian Corporate of the Year – **Hindalco Industries Limited**, Mumbai
- Indian Manufacturer of the Year – **Vedanta Group**, Jharsuguda
- 1st Runner-Up – Indian Manufacturer of the Year – **Bharat Aluminium Company Limited** (BALCO), Korba

Special honours also recognised Sustainability Challengers, Consistency Awards, and Global AI Communication Innovation Leadership, reflecting how manufacturing excellence today extends beyond production into resilience, people impact, and intelligent systems.

The Frost & Sullivan India Manufacturing & Excellence Awards, yesterday, offered a powerful reminder that manufacturing excellence today is no longer about output alone. What stood out was the depth of evaluation behind the awards: projects rooted in safety, sustainability, digital modelling, community impact, AI-driven communication, and consistency over years, not just one-off initiatives.

The apex recognitions told an important story:

- **Hindalco Industries Limited** as Indian Corporate of the Year
- **Vedanta Group**, Jharsuguda as Indian Manufacturer of the Year
- **BALCO**, Korba 1st Runner-Up, alongside consistency recognitions

Outstanding winners were the winners of winners from large metals and energy players to plants, refineries, mines, resources, auto components, logistics, and AI-led communication platforms like emotiv.

Behind every certificate on that stage was a team that executed, measured, corrected, and sustained performance often quietly, over several years.

For me, this wasn't just an awards evening; it was a snapshot of how Indian manufacturing is maturing: more structured, more accountable, and increasingly global in mindset. Congratulations to all the winners and leadership teams. Well deserved.

Mumbai, India, December 22, 2025 – Frost & Sullivan successfully hosted the 2025 edition of the [India Manufacturing Excellence Awards \(IMEA\)](#) and the [Sustainability 4.0 Awards](#), bringing together leading industry professionals for an evening of celebration, benchmarking, and inspiration.

The event took place at ITC Grand Maratha, Mumbai, underlining Frost & Sullivan's continued commitment to fostering manufacturing excellence and sustainability in India.

The 2025 edition reaffirmed the importance of aligning business excellence with long-term, sustainable strategies, especially as India's manufacturing landscape rapidly evolves with digital transformation, supply chain complexity, and environmental considerations.

Driving Manufacturing Excellence: IMEA 2025

Now in its 21st edition, IMEA remains India's earliest and the most recognized and respected assessment-based manufacturing award. The 2025 framework evaluated organizations on manufacturing capability, extended supply chain reliability, and technology adoption, reinforcing Frost & Sullivan's commitment to holistic operational excellence.

At the heart of the awards is Frost & Sullivan's rigorous assessment methodology, refined over more than 2,000+ manufacturing sites, which provides participating organizations with detailed facility scorecards, benchmarking, and actionable
