

## STATE OF THE SECTOR

"The state of the sector report provides an in-depth analysis and comprehensive overview of the current landscape, trends, challenges, and opportunities within the manufacturing sector. This report delves into the intricate details of production, technological advancements, market dynamics, regulatory frameworks, and global influences shaping the industry. By examining key metrics, emerging innovations, and the impact of socio-economic factors, this report aims to offer actionable insights, enabling stakeholders to make informed decisions, foster sustainable growth, and drive the manufacturing sector towards greater efficiency, resilience, and competitiveness in today's dynamic business environment."

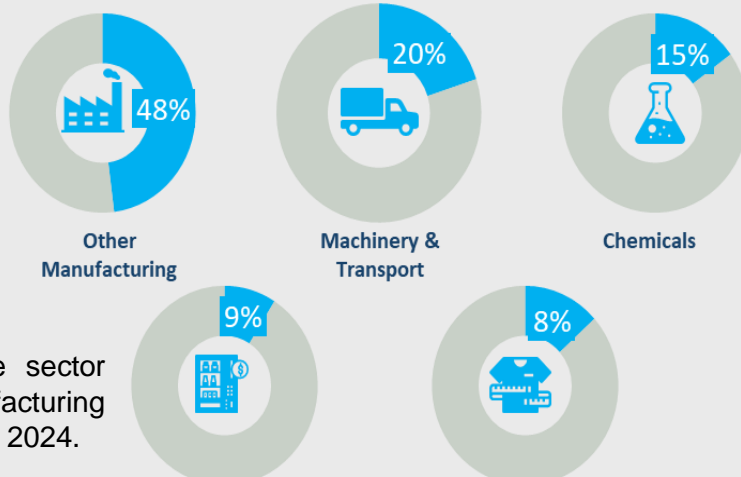

### WHY SHOULD MANUFACTURING ORGANIZATIONS TRANSFORM?

**Legacy systems, unless modernized, can be a barrier to achieving stakeholder objectives in present and future times**

#### Contribution by sector

### Emerging Opportunities

"Participants will get the state of the sector report on megatrends in digital & manufacturing transformation in the award event in Dec 2024.
